

CMC'S 9TH AVENUE COLLECTION PRESENTS RAREST OF THE RARE NATURAL STONES

The most exquisite stones from the best quarries in the world

GH BY SEEMA SREEDHARAN | NOV 9, 2020, 19:21 IST

Marble is the quintessential symbol of luxury -- has always been, and perhaps will remain that way for a long time to come. And with good reason. The patterns, the colours, the luminosity that you find in these natural stones is unbelievable. Marble will always remain the most coveted material when it comes to home decor. And Classic Marble Company (CMC) brings to you the most exclusive and the most exquisite marble from around the world. With 9th Avenue, CMC brings to the country the rarest of the rare and the most precious natural stones found on earth.

"The product range offered through 9th Avenue is a limited edition of natural stones for the discerning buyer. The range is not just exclusive but is also a never-seen-before collection of semi-precious and exotic natural stones," says Amit Shah, Managing Director, CMC. Presently CMC offers over 200 varieties of exquisite natural stones including Marble, Quartzite, Travertine and Onyx among others. 9th Avenue is CMC's most premium collection to date. In fact, at their facility in Silvassa, an entire experience centre is dedicated to the 9th Avenue Collection. "A stroll through the gallery will leave you awestruck with the breathtaking, almost incomprehensible beauty of the stones," Shah enthuses. "A very experienced and dedicated team of stonologists are tasked with the duty of finding the rarest of the rare stones. The stones are merited based on various characteristics including its chemical composition, age, consistency in colour and strength among other factors that determine its uniqueness and pedigree," adds Shah.

The CMC facility in Silvassa is a destination in itself. The sheer magnitude, the expansive collection and the whole process of creating the final product -- it's a different experience altogether. "The gallery exhibits exclusively handpicked natural stones sourced from Europe, North America and South America. Stone enthusiasts no longer have to travel to foreign countries to satiate their quest for exotic natural stones."
